

MOHAN SRIRAM KUNAMSETTY

Agentic AI Engineer | AI/ML & Full-Stack Developer | Oracle Certified Agentic AI Foundations Associate

Ongele, Andhra Pradesh, India | mohansriramkunamsetty@gmail.com | +91 6302342821 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Rank #1 – IEEE Summer of Code 2026 • AIR #13 – AMD AI Engage India • Patent Filed – SITA 2.0 • Top 6 India – Scaler PromptWars

PROFESSIONAL SUMMARY

Agentic AI Engineer and B.Tech Computer Science (Data Science) student who builds production-grade autonomous systems, not tutorials. Oracle Certified Agentic AI Foundations Associate, ranked #1 nationally in the IEEE Summer of Code 2026 National Open-Source Fellowship (Final Round, 1,000+ developers, 100+ projects). Co-founder of two MeitY Startup Hub GENESIS PILOT-incubated ventures, including a filed Indian patent for a real-time computer-vision traffic-intelligence system (YOLOv8, ByteTrack, EasyOCR). Ranked AIR #13 in India in AMD's national AI Engage Student Program and Top 6 in India at Scaler Ascent PromptWars x Google. Builds multi-agent LLM systems, RAG pipelines, and cybersecurity-grade agentic backends using Gemini/Google GenAI, FastAPI, React/TypeScript, and Docker/Kubernetes — backed by 50+ certifications spanning agentic AI, LLM security, computer vision, and cloud-native DevOps.

CORE COMPETENCIES / TECHNICAL SKILLS

Agentic AI & LLMs: Multi-agent orchestration, RAG pipelines, prompt engineering, LLM cost/token optimization, RL with LLMs, Gemini API, Google GenAI SDK, LangChain, Ollama, agent skills

Machine Learning & Computer Vision: YOLOv8, ByteTrack, EasyOCR, OpenCV, PyTorch, GNN/GCN threat graphs, IsolationForest, real-time video analytics, object detection & tracking

Languages: Python, TypeScript, JavaScript, Kotlin, Dart, SQL, Java

Full-Stack Development: React, Next.js, Vite, Tailwind CSS, Radix UI, FastAPI, Flask, Express, REST APIs, WebSockets

Cloud & DevOps: Docker, Kubernetes, Terraform, Ansible, Google Cloud (Cloud Run/Tasks/GCS), AWS, Firebase, Supabase, Redis, CI/CD (GitHub Actions), SRE fundamentals

Mobile & IoT: Kotlin/Jetpack Android, Flutter/Dart, ESP32 IoT integration, offline-first architecture

Cybersecurity: LLM security (CLLMSP-certified), MITRE ATT&CK, SOAR playbooks, UEBA, Kali Linux, penetration testing, malware analysis, APK reverse engineering

CERTIFICATIONS (SELECTED — 50+ TOTAL)

- Oracle Certified Agentic AI Foundations Associate — Oracle University (Jul 2026 – Jul 2028)
- Certified LLM Security Professional (CLLMSP) — Red Team Leaders (Jun 2026)
- Google Cloud Gen AI Academy APAC 2026, Cohort 2 — Google Cloud x Hack2Skill (Jul 2026)
- AI Engineer for Developers Associate & AI Engineer for Data Scientists Associate — DataCamp (May–Jun 2026)
- Google AI Essentials & Google Prompting Essentials Specializations, 9 courses — Google / Coursera (May 2026)
- AMD AI Academy — 15+ courses: RAG, multi-agent systems, RL with LLMs, Triton kernels, Kubernetes on AMD GPUs, vLLM/MI300X inference (May–Jun 2026)
- AWS Fundamentals of Machine Learning and AI — Amazon Web Services (Nov 2025)
- Career Essentials in GitHub Professional Certificate — LinkedIn Learning / GitHub (Nov 2025)

FLAGSHIP PROJECTS

SITA 2.0 — AI Civic Traffic Intelligence Platform | *Founder & Team Lead, MeitY GENESIS PILOT-incubated*

- Engineered a real-time traffic-intelligence system with YOLOv8 detection, ByteTrack multi-object tracking, and EasyOCR license-plate recognition across Dockerized, event-driven microservices with a live React dashboard.
- Directed a 5-phase engineering audit hardening authentication, deployment configuration, and CV pipeline accuracy; filed Indian patent and co-authored IEEE publication.

RAKSHAK v6 — AI Cybersecurity Intelligence Platform

- Built a defense-oriented SOC platform with MITRE ATT&CK mapping (700+ techniques), GNN threat graphs (PyTorch), UEBA behavioral analytics, RAG-based threat intel, and SOAR playbooks with a SHA-256 hash-chained audit ledger.
- Integrated a live NVD CVE feed, IsolationForest/FFT beaconing detection, and 5-agent SOC orchestration; submitted to India AI Impact Festival 2026 and ET AI Hackathon 2026.

CampusOS — Multi-Agent Campus Operations Backend | *byteXL Agent Forge Hackathon, AMD MI300X Track*

- Built a four-agent autonomous backend (canteen, timetable, hostel grievance, security/curfew) using Ollama Llama 3.1:8B, LangChain RAG, SQLite WAL, and APScheduler SLA escalation, backed by a 51-test pytest suite and CI pipeline.

PromptIQ — LLM Token & Cost Optimization Platform

- Built a TypeScript/React tool reducing LLM API costs via prompt compression and token-usage analytics, integrated with the Google GenAI SDK across 230+ source files.

LEXGUARD — AI Contract & Legal Risk Intelligence System

- Designed an adversarial multi-agent system that analyzes contracts and policy documents to surface exploitative clauses and legal risk, deployed on Cloud Run with Gemini-based agent reasoning.

Samvaad AI — Gemini-Powered Sales Intelligence Platform

- Built an AI sales platform supporting 500+ prompt generations with sub-2-second response latency, using the Gemini API for personalized, explainable persuasion-driven messaging.

PetPulse SmartCare — AI-Powered IoT Smart Pet Feeder | Founder & Lead Engineer, MeitY GENESIS PILOT-incubated

- Co-built an IoT smart-feeding system (ESP32, Flutter, Firebase, FastAPI) with real-time telemetry, QR device pairing, biometric access lock, and a full Next.js/React Three Fiber marketing site; provisional patent filed.

PROFESSIONAL EXPERIENCE & LEADERSHIP

Campus Mantri — Official Representative, GeeksforGeeks | QIS College of Engineering and Technology Jun 2026 – Present

- Serve as official liaison between GeeksforGeeks and the student community; organize technical events and drive platform engagement campus-wide.

Campus Crew Member, HackerRank | QIS College of Engineering and Technology Aug 2026 – Present

- Selected after a competitive interview round to lead coding-community initiatives and spread HackerRank's mission across campus.

Infosys Springboard Virtual Internship 7.0 May 2026 – Present

EduSkills / AICTE Virtual Internship — Ethical Hacking Jun–Aug 2026 (Completed)

- Completed an 8-week program covering Kali Linux, penetration testing methodology, social engineering defense, malware analysis, and web application vulnerability assessment, culminating in a capstone project.

EduSkills / AICTE Virtual Internship — DevOps & Cloud Automation Apr–Jun 2026 (Completed)

- Completed a 10-week curriculum spanning Docker, Kubernetes, Terraform, Ansible, and CI/CD with GitHub Actions, culminating in a capstone microservice deployment.

SkillDzire / AICTE Internship — Web Development & Cloud Integration May–Jun 2026 (Completed)

VedUpskilling — AI with Python, Training & Internship Dec 2025 – Feb 2026

- Letter of Recommendation received.

ACHIEVEMENTS & RECOGNITION

- Rank #1, IEEE Summer of Code 2026 — National Open-Source Fellowship; selected in the Final Round among 1,000+ developers and 100+ projects nationwide.
- **Certificate of Merit | PromptWars Virtual — Google for Developers × Hack2Skill**
Recognized among the **Top 100 performers globally** in Challenge 3, competing against **46,000+ participants worldwide**. AIR #13 in India — AMD AI Engage Student Program , Top 100 students nationally.
- Top 6 in India — Scaler Ascent PromptWars x Google, among thousands of participants nationwide.
- Indian Patent Filed — SITA 2.0 AI traffic surveillance system; IEEE publication co-authored.

EDUCATION

B.Tech, Computer Science and Engineering (Data Science)

QIS College of Engineering and Technology (QISCET), Ongole, Andhra Pradesh | 2024 – 2028

Intermediate (MPC), Narayana Junior College | 2022 – 2024 | 93%
